## EXPERIENCE

SINCE SEP 2020 (PART-TIME)

Getafix Design

### **Freelance Software Developer**

Developed a web app for a news organization using Python, Flask, and Selenium to automate newsletter generation for the marketing team.

[github.com/hvrc/newsletter](https://github.com/hvrc/newsletter)

**Contact:** Husain Hakim, husainhk@gmail.com

Developed a Python desktop app to convert .png images into .plt files for QR code laser engraving, streamlining QR-coded vehicle number plate production.

[github.com/hvrc/pngtoplt](https://github.com/hvrc/pngtoplt)

**Contact:** Satish Chandra, chandraoooin@gmail.com

FEB. 2022 – MAY. 2025 (FULL-TIME)

Healthy Planet

### **Automation Engineer**

Integrated Healthy Planet's ERP (Microsoft Dynamics NAV) with the AutoStore automated storage system and Bastian Solutions' Exacta software.

Developed Python scripts and a Django API to create test datasets, automate data exchange between ERP and AutoStore, and manage workflows for 10,000 SKUs across 3000 robot-controlled bins.

Acted as the technical liaison, onboarding and training warehouse staff to ensure a smooth transition to the automated platform.

AutoStore, Exacta Software

**Lead:** Sulman Shahid, sshahid@healthyplanetcanada.com

JUN. 2019 – AUG. 2020 (INTERNSHIP)

Gromor Finance

### **Data Analyst**

Developed a RESTful API using Python, Pandas, and Django to generate credit risk reports from customer data in MongoDB.

Tested API with Postman and wrote JUnit tests for the Java-based flag-ship software.

Contributed to sprints by designing Figma mockups and user flow diagrams.

**Supervisor:** Santosh Shetty, santois@gmail.com

## SKILLS

|            |                                                        |
|------------|--------------------------------------------------------|
| LANGUAGES  | Python, C#, JavaScript, TypeScript, HTML, CSS          |
| FRAMEWORKS | Flask, Django, React, Node.js, Express, n8n, LangChain |
| TESTING    | Selenium, Playwright, Postman, Pytest, JMeter          |

## PROJECTS

**Carrom** | *Phaser.js, Socket.io, Google Cloud Platform.*

Developed a billiards-style web-based tabletop game, with room-based multiplayer.

Implemented multiple game modes and a leaderboard system, to enhance engagement and scalability.

[carrom-461712.ue.r.appspot.com](https://carrom-461712.ue.r.appspot.com)

**Boteh** | *Google MediaPipe, Web Audio API, React.*

Created a synthesizer controlled by hand gestures, with classic synth controls and audio effects.

Enabled creation of multiple synthesizer instances, audio recording and exporting, to improve user interaction and functionality.

[boteh-461905.appspot.com](https://boteh-461905.appspot.com)

**RTS** | *Python, PyTorch, BERT.*

Built a word association game featuring a text message-style frontend using natural language processing and pre-existing machine learning models.

Fine-tuned models with user input, to enhance personalization and model accuracy.

## EDUCATION

2021 – 2025 **Bachelor of Computer Science**  
Sheridan College, Oakville, Canada

Worked on an educational gardening game; Summer Garden (showcased at Level Up 2025, Toronto)

Integrated Firebase/Firestore for cloud data syncing and asset storage, procedural biome generation, and a plant growth system in Unity using C#.

Created a CI/CD pipeline using Terraform to automate integration testing for team contributions and to streamline the build process.
