## EDUCATION

### Sheridan College

Sep 2021 - May 2025 (4 years)

Honours Bachelor of Computer Science

Oakville, Canada

- Worked on an educational gardening game called Summer Garden, integrating **Firestore** for cloud updates and asset storage, procedural biome generation and a plant growth system in **Unity** using **C#**. [Link](#)

---

## EXPERIENCE

### Software Developer / Integration Engineer

Feb 2022 - May 2025 (3 years 4 months)

Healthy Planet

Toronto, Canada

- Contributed to an automated warehouse project (AutoStore) in collaboration with Bastian Solutions, using **C#** and **ASP.NET** for backend development.
- Integrated Exacta Touch software with Healthy Planet's ERP (Microsoft Dynamics NAV) and warehouse operations, creating a data pipeline using **SQL** for database management and **LAMP stack** for server-side integration.
- Designed tools for efficient software testing using **C#** unit testing frameworks.
- Provided a vital communication bridge between software and warehouse teams.
- Assisted in onboarding and training warehouse staff for AutoStore operations, ensuring a smooth transition to automation.

### Freelance Software Developer

Sep 2020 - Present (4+ years)

Getafix Design

Remote

- Designed and implemented a **Flask** web app now used by a news organization, enabling automated generation of newsletters, simplifying workflow for the marketing team. [Link](#)
- Developed a desktop app using **Python** to convert PNG images into PLT files for QR code laser engraving, ensuring precision in engravings for vehicle number plates. [Link](#)
- Successfully delivered 15+ client projects, consistently meeting client expectations and completing tasks ahead of deadlines.

### Data Analyst

Jun 2019 - Aug 2020 (1 year 3 months)

Gromor Finance

Mumbai, India

- Simplified complex loan data into accessible visual formats using **React** and **D3.js**.
- Developed a RESTful API using Python and **Django**, accessing data from **MongoDB**, generating reports to communicate client trends and risk insights, deployed internally via **Docker**. [Link](#)
- Contributed to team sprints with mockups and user flow diagrams using **Figma**.

---

## PROJECTS

### Carrom | Phaser.js, Express.js, Node.js

[Link](#)

- Web implementation of a tabletop game similar to billiards

### Boteh | Google MediaPipe, Web Audio API, Node.js

[Link](#)

- Synthesizer played with hand gestures tracked by a camera

### RTS | Python, WebNet, React, Vite

[Link](#)

- Web application that takes links to articles from client's news website and generates .html newsletters

---

## TECHNICAL SKILLS
