## EDUCATION

### Sheridan College

*Honors Bachelor of Computer Science*

Oakville, Canada

Sep. 2021 – May 2025

- Worked on an educational gardening game; Summer Garden (showcased at Level Up 2025, Toronto), integrating **Firestore** for cloud data syncing and asset storage, procedural biome generation, and a plant growth system in **Unity** using **C#**. [Link](#)
- Created a **CI/CD pipeline** using **Terraform** to automate integration testing for team contributions and to streamline the build process. **Capstone Lead**: Prof. William Barry, [william.barry@sheridancollege.ca](mailto:william.barry@sheridancollege.ca)

## EXPERIENCE

### Freelance Software Developer

Sep. 2020 – Present

*Getafix Design*

*Remote*

- Developed a web app for a news organization using **Python**, **Flask** and **Selenium** to automate newsletter generation for the marketing team. **Contact**: Husain Hakim, [husainhk@gmail.com](mailto:husainhk@gmail.com) [Link](#)
- Developed a **Python** desktop app to convert .png images into .plt files for QR code laser engraving, to streamline QR coded vehicle number plate production. **Contact**: Satish Chandra, [chandra00in@gmail.com](mailto:chandra00in@gmail.com) [Link](#)

### Automation Engineer

Feb 2022 – May. 2025

*Healthy Planet — Lead: Sulman Shahid, [sshahid@healthyplanetcanada.com](mailto:sshahid@healthyplanetcanada.com)*

*Toronto, Canada*

- Integrated Healthy Planet's ERP (**Microsoft Dynamics NAV**) with the **AutoStore** automated storage and retrieval system and Bastian Solutions' **Exacta** software.
- Developed **Python** scripts and a **Django** API to create test data sets, automate data exchange between the ERP and AutoStore and to manage test workflows for 10,000 SKUs distributed across 3000 robot-controlled bins connected to a conveyor system.
- Acted as the technical liaison, onboarding and training warehouse staff to ensure a smooth transition to an automated platform.

### Data Analyst Intern

Jun. 2019 – Aug. 2020

*Gromor Finance — Supervisor: Santosh Shetty, [santois@gmail.com](mailto:santois@gmail.com)*

*Mumbai, India*

- Developed a **RESTful** API using **Python**, **Pandas**, and **Django**, to generate credit risk reports from customer data in **MongoDB**. [Link](#)
- Tested API with **Postman** and wrote **JUnit** tests for their Java-based flagship software.
- Contributed to sprints by designing **Figma** mockups and user flow diagrams.

## PROJECTS

### Carrom | *Phaser.js, Socket.io, Google Cloud Platform*

- Developed a billiards-style web-based tabletop game with room-based multiplayer.
- Implemented multiple game modes and a leaderboard system, to enhance engagement and scalability. [Link](#)

### Botch | *Google MediaPipe, Web Audio API, React*

- Created a synthesizer controlled by hand gestures, with classic synth controls and audio effects.
- Enabled creation of multiple synthesizer instances, audio recording and exporting, to improve user interaction and functionality. [Link](#)

### RTS | *Python, PyTorch, BERT*

- Built a word association game featuring a text message-style frontend using natural language processing and pre-existing machine learning models.
- Fine-tuned models with user input, to enhance personalization and model accuracy. [Link](#)

## TECHNICAL SKILLS

**Languages**: Python, C#, HTML, CSS, JavaScript, TypeScript

**Frameworks & Libraries**: Flask, Django, React, Node.js, Express

**QA**: Selenium, Pytest, Playwright, Postman, JMeter

**Databases**: MySQL, PostgreSQL, MongoDB, DynamoDB, Firebase

**DevOps**: Google Cloud Platform, AWS, Kubernetes, Docker, Git, Arduino

**Other Software**: Ableton Live, TouchDesigner, Blender, Adobe Photoshop, Premiere Pro, Unity, Unreal
